We are introducing enhancements to two of our most popular products in the Leadership Architect® Suite.

- *New labeling so cards can be sorted vertically or horizontally.* This feature makes the cards useful for sorting cards in small spaces and provides quicker sorting for those familiar with the competency definitions. With the new format, competency numbers are at the top and Factor/Cluster coding is at the margin.
- *Divider cards show definitions on the back.* This feature provides sorters with a common definition for each point on the scale and allows for more accurate and consistent sorting.
- *Divider cards are grouped together by different shades of gray.* Sorters use this feature to find sorting scales at-a-glance.
